Cardiff Port Sanitary Authority.

95, BUTE STREET,

CARDIFF,

April, 1917.

To the Chairman and Members of the Cardiff Port Sanitary Authority.

GENTLEMEN,

I have the honour to submit to you my Annual Report for the year 1916.

The Regulations of the Local Government Board prescribe, with regard to the Medical Officer of Health :—

“ That he shall prepare an annual report, to be made to the end of December, “ in each year, comprising tabular statements so far as he shall have been able “ to obtain the necessary information, of the sickness and mortality of persons “ on ship-board within the District, classified according to diseases, ages, and “ vessels, and a summary of the action taken during the year for preventing the “ spread of disease. The report shall also contain an account of the proceedings “ in which he has taken part or advised under the Public Health Act, 1875, so “ far as such proceedings relate to conditions dangerous or injurious to health, “ and also an account of the supervision exercised by him, or on his advice, for “ Sanitary purposes over places and vessels that the Port Sanitary Authority “ has power to regulate, with the nature and results of any proceedings which “ may have been so required and taken in respect of the same during the year.”

In view of the special conditions which prevail at the present time, it is considered advisable in the interests of economy to reduce the volume of the report for this year to the smallest possible compass.

The Local Government Board has issued a circular note addressed to Medical Officers of Health, in which it is stated that having regard to the present circumstances “ The Board consider that many of the details usually inserted in the Annual Report, such as a description of the district and of the water supply, sewerage and sewage disposal, may be omitted and that the report may be confined to a record of what has taken place during the year.”

In compliance with the terms of this letter, this report will contain only a brief account of the routine work of the year in the Health Department of the Port.

Inspectors F. Wood, F. Howell, T. D. Hill, and W. J. Davies, have been on military duty during the year and their places have been filled by temporary Inspectors John Morgans, F. Sartain and O. T. George.

The following Table gives particulars of vessels and tonnage, foreign and coastwise, entering the Cardiff Port Sanitary District, kindly supplied to me by H.M. Collector of Customs.

TABLE I.

YEARS.	NUMBER OF VESSELS.		Total No. of Vessels Foreign and Coastwise.	TONNAGE.		Total Tonnage Foreign and Coastwise inwards.
	Foreign.	Coastwise.		Foreign.	Coastwise.	
1900	3,212	8,858	12,070	3,127,985	2,850,479	5,978,464
1901	2,829	8,755	11,584	2,917,948	2,750,335	5,668,283
1902	2,763	9,337	12,100	2,729,563	2,953,915	5,683,478
1903	2,544	9,130	11,674	2,821,927	2,976,901	5,798,828
1904	2,370	8,635	11,005	2,563,188	3,178,989	5,742,177
1905	2,437	9,959	12,396	2,662,128	3,252,663	5,914,791
1906	2,790	9,306	12,096	3,386,347	3,236,673	6,623,020
1907	3,018	8,798	11,816	3,799,249	3,163,622	6,962,871
1908	2,890	8,163	11,053	3,675,274	2,821,260	6,496,434
1909	2,846	8,400	11,246	3,788,643	3,017,152	6,805,795
1910	2,925	9,340	12,265	3,719,987	3,371,362	7,091,349
1911	2,864	8,991	11,855	3,840,594	3,088,173	6,928,767
1912	3,013	8,009	11,022	3,954,927	3,444,446	7,399,373
1913	3,329	7,806	11,135	4,458,875	3,610,470	8,069,345
1914	2,943	7,423	10,366	4,125,437	3,794,786	7,920,223
1915	3,342	6,401	9,743	3,044,111	3,862,154	6,906,265
1916	5,604	6,913	12,517	5,776,910	5,540,249	11,317,159

INFECTIOUS DISEASES :—The powers which the Port Sanitary Authority possesses for dealing with the ordinary Infectious Diseases, which are always more or less present in this country, are derived from the Public Health Acts and the Regulations made by the Authority under the provisions of these Acts. The Regulations made by the Cardiff Port Sanitary Authority under Section 125 of the Public Health Act, 1875, are as follows :—

1.—In these Regulations, the expression “The Port Sanitary Authority” means the Mayor, Aldermen and Burgesses of the Borough of Cardiff, acting by the Council, as the Port Sanitary Authority ; the expression “The District” means so much of the Customs’ Port of Cardiff as, under an Order of the Local Government Board, dated the 15th day of September, 1894, is comprised within the jurisdiction of the Port Sanitary Authority ; the expression “Ship” includes a Boat ; the expression “Medical Officer of Health” includes any legally qualified Medical Practitioner lawfully authorised to act on behalf of such Officer ; the expression “Dangerous Infectious Disorder” means any one of the following diseases :—

SMALL-POX
MEMBRANOUS CROUP
TYPHUS FEVER

RELAPSING FEVER
DIPHTHERIA
SCARLATINA OR SCARLET
FEVER

TYPHOID FEVER
CONTINUED FEVER

2.—These Regulations shall remain in force until they are revoked by the Port Sanitary Authority, or until fresh Regulations under Section 125 of the Public Health Act, 1875, are made by the Port Sanitary Authority and approved of by the Local Government Board.

3.—Every Master or other person having charge of a ship arriving in the District with any person on Board, whether a passenger or belonging to the ship’s crew, suffering from a dangerous infectious disorder, shall stop on arrival in any dock-basin, river, harbour, or canal within the District, and forthwith send notice to the Medical Officer of Health of the Port Sanitary Authority, stationed at his office at Cardiff, that there is a person on board suffering from such a disorder.

4.—The Master or other person in charge of the ship shall cause her to remain in any dock-basin, river, harbour, or canal within the District in which she shall have stopped on arrival, until the Medical Officer of Health has boarded her.

5.—The Medical Officer of Health, to whom notice is given either by the Master or person in charge of the ship, or by an Officer of the Port Sanitary Authority boarding the ship on its arrival, that there is a person on board suffering from a dangerous infectious disorder, shall, as soon as practicable, visit the ship, and ascertain whether the person referred to in the notice is suffering from such a disorder, and if in the opinion of the Medical Officer of Health he is, and can properly be removed, and proper accommodation can be provided for him in the Hospital of the Port Sanitary Authority of Cardiff, or in some other Hospital to which the Port Sanitary Authority are entitled to remove patients, the Master or other person having charge of the ship shall forthwith cause such person to be removed to such Hospital, according to the directions of the Medical Officer of Health.

6.—If any dangerous infectious disorder shall break out on board any ship, arriving in the District, and after she has passed into any dock-basin, river, harbour, or canal, the Master or other person having charge of such ship shall give notice to the Medical Officer of Health of the Port Sanitary Authority at his Office at Cardiff, that there is on board a person suffering from such disorder, and if, upon examination, the Medical Officer of Health shall find that he is so suffering, the Master or other person in charge of such ship shall forthwith cause such person to be removed to a Hospital to which the Port Sanitary Authority are entitled to remove patients, as directed by the Medical Officer of Health.

7.—Every person who shall offend against any of the foregoing Regulations shall be liable for every such offence to a penalty of Forty Shillings.

In addition to the above, the Port Sanitary Authority has adopted the Infectious Disease Notification Act, 1889, which requires the notification to the Medical Officer of Health by Medical Practitioners of all cases of the ordinary Infectious Diseases coming under their care. In September, 1900, the Local Government Board, by order, extended the provisions of this Act to the notification of every case of Plague occurring in the district. Circular letters were sent by me to Medical Practitioners informing them of their duties in this respect.

The hospital referred to in the above Regulations is that belonging to the Cardiff Urban Sanitary Authority, in which accommodation is provided for persons suffering from diseases specified, on board ships within the District of the Port Sanitary Authority of Cardiff.

DIPHTHERIA.—On July 29th, a notification was received from a medical practitioner in the city, that E. H., aged 24 years, A.B. on board the Norwegian s.s. "Harald," lying in the Roath Dock, was suffering from Diphtheria. He was forthwith removed to the City Sanatorium, taking his effects with him. The crew space on board was thoroughly cleansed with disinfectants.

On August 31st, a notification was received from a medical practitioner in the city, that M. B., aged 20 years, steward on board the Norwegian s.s. "Stolt," lying in the West Bute Dock, was suffering from Diphtheria. He was forthwith removed to the City Sanatorium; his effects removed for disinfection; his berth disinfected and the water tanks emptied and cleansed.

ERYSIPELAS.—On April 14th, a notification was received from a medical practitioner in the city, that J. S., aged 24 years, carpenter on board the British s.s. "Terek," lying in the Queen Alexandra Dock, was suffering from Erysipelas. He had been medically attended at Foynes, and he went to his home at Sunderland; the Medical Officer at that port being notified. His berth on board the vessel was disinfected.

On May 1st, a notification was received from a medical practitioner in the city, that G. C., aged 40 years, a fireman on board the Italian s.s. "Hermersberg," lying in the Roath Dock, was suffering from Erysipelas. He was removed to the Royal Hamadryad Seamen's Hospital for treatment. His berth on board the vessel was disinfected.

On October 4th, the Medical Superintendent of the Royal Hamadryad Seamen's Hospital, notified a case of Erysipelas, J. T., aged 58 years, fireman on board the s.s. "Northwaite." He had left his ship abroad and was admitted into the hospital on September 9th.

MEASLES.—On February 22nd, a notification was received from a medical practitioner in the city that H. P., aged 16 years, O.S. on board the Norwegian s.s. "Norne," lying in the East Bute Dock, was suffering from Measles. He was isolated and treated on board and the forecabin was subsequently disinfected and cleansed. His effects were also removed for disinfection.

On March 27th, it was reported to me that W. J. T., aged 18 years, Wireless operator on board the British s.s. "Polymnia," lying in the Roath Basin, was ill on board. I examined him and found that he was suffering from German Measles. He was forthwith removed to the City Sanatorium. His effects and bedding were removed for disinfection and his berth cleansed with disinfectants.

On June 9th, a notification was received from a medical practitioner, that A. W., aged 29 years, boatswain on board the British s.s. "Strathairly," lying at Penarth Dock, was suffering from German Measles. He was forthwith removed to the City Sanatorium; his berth disinfected and effects removed for disinfection.

On October 26th, it was reported to me that P. T., aged 15 years, cadet on board the British s.s. "Aparima," lying in the Roath Dock, was suffering from Measles. He was isolated on board and being medically attended by the ship's doctor. His berth and effects were subsequently disinfected.

PHTHISIS.—During the year ended December 31st, twenty-two cases of Phthisis were notified, as compared with seven during the previous year. Some of these cases were notified from the Royal Hamadryad Seamen's Hospital and others were treated on board the ships.

SCARLET FEVER.—On January 11th, a notification was received from the Medical Superintendent of the Royal Hamadryad Seamen's Hospital, that B. J., aged 17 years, apprentice on board the s.s. "Ella Sayer," lying in the Queen Alexandra Dock, was suffering from Scarlet Fever. The patient was forthwith removed to the City Sanatorium. His berth on board the ship was disinfected, also his effects.

Patient had left the ship on arrival at Birkenhead, and went to his home at Newcastle, rejoined the ship again and sailed for Cardiff. He was sent to the hospital on arrival and the next morning the case was notified. The ward at the hospital, also bedding, was disinfected.

TYPHOID FEVER.—On February 18th, the Medical Superintendent of the Royal Hamadryad Seamen's Hospital notified a case of Typhoid Fever, A.M., aged 17 years, O.S. on board the French s.s. "Hendaye," lying at Barry Dock. He was admitted into hospital on the 3rd. His effects, also bedding, removed for disinfection and the ward at the hospital disinfected.

On April 14th, the Medical Superintendent of the Royal Hamadryad Seamen's Hospital, notified a case of Typhoid Fever, A. N., aged 26 years, A.B. on board the Norwegian s.s. "Skjold," lying at Penarth Dock. He was admitted into hospital on April 6th, the vessel having arrived on the 3rd. Vessel had sailed previous to receiving the notification. Bed and bedding were removed from the hospital for disinfection, also the ward disinfected.

On June 7th, a notification was received from a medical practitioner in the city, that B. E., engineer on board the Norwegian s.s. "Thyra," lying in the East Bute Dock, was suffering from Typhoid Fever. He was forthwith removed to the City Sanatorium; his berth disinfected, also effects removed for disinfection. The vessel had been in dock for some days previous to receiving notification.

On July 23rd, the Medical Superintendent of the Royal Hamadryad Seamen's Hospital notified a case of Typhoid Fever, W. H. W., aged 19 years, apprentice on board the s.s. "Arlington Court," lying in the Queen Alexandra Dock, was admitted on the 23rd. His effects were removed for disinfection and his berth on board disinfected. A sample of the drinking water was submitted to the Cardiff and County Public Health Laboratory for analysis, and which proved to be of good quality.

On August 8th, the Medical Superintendent of the Royal Hamadryad Seamen's Hospital notified a case of Typhoid Fever, S. O. T., aged 23 years, A.B. on board the Norwegian s.s. "Rutunfjell." He was admitted to hospital on July 31st, the vessel lying at Barry Dock. Some bedding was subsequently disinfected also the ward at the hospital.

On August 18th, a notification was received from a medical practitioner in the city, that J. S., aged 28 years, master of the Belgian s.s. "Antigoon," lying in the Roath Dock, was suffering from Typhoid Fever. He was removed to hospital; his effects and cabin on board were disinfected. The vessel had been in dock for some days previous to receiving notification.

On November 8th, the Medical Superintendent of the Royal Hamadryad Seamen's Hospital notified a case of Typhoid Fever, A. B., aged 35 years, fireman on board the s.s. "Visigoth," lying in the Roath Dock. He was admitted into hospital on the 5th. His effects were removed for disinfection, and the forecastle was disinfected and cleansed.

The following Table gives the number of vessels boarded during the year ended December 31st, 1916, by the Medical Officer of Health and his Assistants, on account of disease on board during the voyage, or during the vessel's stay in the district of the Cardiff Port Sanitary Authority.

TABLE II.

DATE 1916	TIME	NAME OF SHIP	NATIONALITY	WHERE FROM	NATURE OF SICKNESS	GENERAL PARTICULARS.
Jan. 3	4.40 p.m. ...	s.s. "Ciboure" ...	French ...	Bizerta ...	Cold ...	The Master reported on arrival at Roath Dock, that J. D., fireman, aged 42 years, was suffering from a severe cold. Medical treatment obtained and he was treated on board.

" 18	1.0 a.m.	s.s. "Rossum"	Dutch	Liverpool	Pneumonia ...	The Master reported on arrival at the Channel Dry Dock, that he, himself (J. S., aged 43 years), was suffering from a severe Cold. Medical treatment recommended and on the 23rd he died from Pneumonia, after being medically attended on board.
" 21	...	s.s. "Kingfield"	British	London	Phthisis ...	A notification was received from a Medical Practitioner in the City, to the effect that J. M., fireman, aged 36 years, was suffering from Phthisis. He left the ship and went to his home at London.
" 24	...	s.s. "Kullaberg"	Swedish	St. Nazaire	Venereal Disease ...	The Master reported that J. J., aged 21 years, A.B., and K. J. O., fireman, aged 21 years, were suffering from Venereal Disease. Medical treatment recommended.
" 28	10.0 a.m. ...	s.s. "Llanover"	British	Rouen ...	Influenza ...	The Master reported on arrival at Roath Dock, that R. S., A.B., aged 48 years, was laid up on board. Medical treatment obtained, when it was found that he was suffering from Influenza.

CHOLERA, YELLOW FEVER AND PLAGUE.

During the year 1916, only two vessels entered the Port directly from infected Ports. They were dealt with under the Cholera, Yellow Fever and Plague Regulations. 510 rats were caught and destroyed on board these two vessels.

During the year the rat-catchers were engaged on board 57 vessels and the total number of rats caught and subsequently destroyed amounted to 13,547.

The Memorandum of the Medical Officer of Health of the Local Government Board, issued to Sanitary Authorities in November, 1910, describes (1) The Symptoms of Plague; (2) The Diagnosis; (3) The Method of Spread; (4) Rats as being the source of Plague.

Your Committee are aware of the systematic destruction of rats which is carried on in your Port Sanitary District and the warehouses at the Docks. Rats have been submitted from time to time for examination to the bacteriologist of the Cardiff and County Public Health Laboratory, with a view to detecting Plague infection.

The following Table gives the results of the examination by Mr. J. H. Sugden, M.Sc., F.I.C., of seventy-seven rats from vessels in Port during the year ended December 31st, 1916.

During the year Plague was reported in Arabia, Brazil, Ceylon, China, Dutch East Indies, Ecuador, Egypt, England, Greece, India, Indo-China, Japan, Mauritius, Morocco, Persia, Peru, Siam, Straits Settlements and Turkey (Asiatic).

Cholera was reported in Arabia, Ceylon, China, Dutch East Indies, Egypt, Greece, India, Indo-China, Japan, Mexico, Persia, Philippine Islands, Roumania, Straits Settlements and Turkey (Asiatic).

Yellow Fever was reported in Ecuador, French West Indies, Gold Coast, Mexico, Sierra Leone and U.S. America.

A strict examination is made of all vessels on arrival at H.M. Customs Boarding Stations during the day and night tides, whether directly or indirectly from Infected or Suspected ports.

These vessels are dealt with in accordance with the Regulations of the Local Government Board of the 9th September, 1907.

HOSPITAL ACCOMMODATION.—The Hospital on the Flat Holm Island is intended solely for the reception of persons suffering from Cholera, Yellow Fever, or Plague on board Ships. It consists of one pavilion containing two Wards and Nurses' Rooms, Bathrooms, Lavatories, etc. Each Ward contains six beds. In addition to and adjoining the Hospital there is a small Ward with four beds, formerly used for Cholera patients, making altogether permanent accommodation for sixteen patients. At the same time there is ample space on the Island, *i.e.*, about 40 acres, for any temporary extension which might be required. In connection with these buildings is a complete Laundry, a Mortuary, a Post-Mortem Room, and a Crematorium for the destruction of the bodies of persons dying in the Hospital or on board an infected ship. The Caretakers reside in a house adjoining the Hospital belonging to the Port Sanitary Authority, and which is used when required for administrative purposes. An arrangement exists between some other Port Sanitary Authorities and Cardiff in connection with the Hospital accommodation on the Flat Holm Island as follows :—

The Bristol Port Sanitary Authority have the use, on payment of fees, of the Crematorium on the Island for the cremation of bodies of persons dying of Cholera, Yellow Fever, or Plague within their District.

The Cardiff Port Sanitary Authority have agreed to receive into their Hospital on the Flat Holm Island, and to provide all necessary treatment and food for patients sent to the Hospital from the District of the Newport Sanitary Authority, and to cremate the bodies of any such patients who may die in the Hospital, on payment of £40 per annum, and £3 3s. per week for the first Newport patient received into the Hospital, and £2 2s. per week for every additional patient, and a sum of £7 7s. in respect of the cremation of every body of any such patient dying in the Hospital.

An agreement exists between the Port Sanitary Authorities of Cardiff and Barry of a similar character to that between Cardiff and Newport.

By agreement also the Bridgwater Port Sanitary Authority are entitled to send patients into the Cardiff Hospital on payment of an annual sum of £20, and of sums for maintenance of patients similar to the other Authorities.

INSPECTION OF SHIPPING.

During the year 1916, eight thousand and sixty-seven vessels were inspected on arrival. Three thousand three hundred and sixty-five extra inspections were made of work in hand and ships in dock, making a total of eleven thousand four hundred and thirty-two inspections.

Two hundred and twenty-one written notices were served on masters of vessels; nine hundred and fifty-one verbal orders were given; twenty-four letters were sent to owners or their representatives at various ports in this country and abroad in connection with nuisances and sanitary defects on board ships. Thirty-one notices were also served on masters of vessels having polluted water on board for drinking and domestic purposes, being the result of bacteriological examination and analysis at the Cardiff and County Public Health Laboratory.

The systematic inspection of shipping in the Bute and Penarth Docks has been carried out as usual with great efficiency and to my entire satisfaction by the Chief Inspector, David Jenkins, and Staff.

The following is a Summary of the routine duty of the Staff of the Medical Officer of Health :—

(1) EAST AND WEST BASINS, MOUNT STUART DRY DOCKS, AND CANAL.—One Inspector on duty from four hours flood on each tide until the gates are closed, and all vessels boarded. All vessels are boarded on arrival, whether from Foreign or Coastwise, and enquiries made as to the health of the crew, and if there has been any sickness on the voyage. A copy of the Regulations as to Infectious Diseases is handed to every Master.

(2) ROATH BASIN AND CHANNEL DRY DOCKS.—One Inspector on duty from four hours flood on each tide until the gates are closed, and all vessels boarded and examined in the same manner as No. 1.

(3) QUEEN ALEXANDRA DOCK.—Two Inspectors, one by day and one by night, from two hours flood until the gates are closed, and all vessels boarded and examined in the same manner as Nos. 1 and 2.

(4) PENARTH DOCK, ELY HARBOUR, AND WINDSOR SLIPWAYS.—Two Inspectors, one by day and one by night, from two hours flood until the gates are closed, and all vessels boarded and examined in the same manner as Nos. 1, 2, and 3. In addition to tide work, the Inspectors on day duty at Nos. 3 and 4, also visits and examines the ships in these Docks, etc., for the purpose of ascertaining the Sanitary condition of each of the ships therein.

In addition to the above, the Senior Assistant Inspector is on day work examining ships in Docks, etc.

The Chief Inspector supervises the work and assists inspections, and carries out Statutory duties in accordance with the General "Order" of the Local Government Board, dated 21st December, 1910.

The duties are arranged thus :—Each Inspector has one week on tides at Nos. 1 and 2, two weeks on tides, etc., at Nos. 3 and 4 respectively, every sixth Sunday off duty, also, one tide each off duty every Sunday.

The average time on tide duties are as follows :—

East and West Basins—Four hours.
Roath Basin—Four-and-a-half hours.
Queen Alexandra Dock—Eight Hours.
Penarth Dock—Eight Hours.

The annexed Tables will afford evidence of useful work performed by the Officers of the Port Sanitary Authority, and will show that the Inspection of Shipping in the Port has resulted in a great improvement in the Sanitary condition of the floating population.

The chief defects found on board ships were :—Defective side ports and prisms, bulkheads, floors, hawse pipes and cable-casings, defective stoves, funnels and flanges, ventilator cowls and ventilation, lighting and drainage, leaky decks, defective or unlined iron decks over bunks, causing damp beds, etc., defective lamps, water tanks and casks, also defective water-closets.

As a rule very little difficulty was experienced in obtaining compliance with the requirements of the Inspectors.

Shipowners and Masters willingly carry out the recommendations of the Port Sanitary Authority, with the result that the proportion of vessels having Sanitary defects amongst those which frequent the Port has decreased in a most marked manner.

The following Table shows the number of vessels, from Foreign and Coastwise, inspected during the year 1916.

TABLE IV.

* A quantity of this Fish was brought in and used for the manufacture of manure, etc.

DISEASES OF ANIMALS ACTS, 1894 TO 1914.

(And the Orders of the Board of Agriculture and Fisheries made thereunder.)

THE CANINE ANIMALS ORDER OF 1909, AND THE IMPORTATION OF DOGS ORDER, 1914.

During the year ended December 31st, 1916, 1,207 dogs were imported from Foreign countries, either directly or indirectly.

In each case a copy of the Order was supplied to the Master or Officer in charge of the ship on arrival, by an Officer of the Local Authority.

These ships were visited regularly during their stay in Port to see that the requirements of the Order were carried out.

Proceedings were taken on October 17th against the Master of one vessel for non-compliance with the provisions of the Importation of Dogs Order, 1914. Costs only, 5/-, were imposed.

FOREIGN ANIMALS ORDER, 1910.

During the year ended December 31st, 1916, thirty-six vessels arrived at this Port with the following animals on board from scheduled countries, either directly or indirectly, viz. :—

Cattle, 5 ; Sheep, 45 ; Goats, 7 ; Swine, 28 ; Total, 85.

These ships were visited regularly whilst in Port to see that the Regulations of the Board of Agriculture and Fisheries were carried out.

When any of the ships left for another Port in Great Britain, the Authorities at those Ports were notified.

Proceedings were taken against the Masters of eighteen vessels for non-compliance with the requirements of the above Order.

The following gives particulars of action taken and results :—

Totals				18	£9 1s. 0d.

ANNUAL REPORT OF D. JENKINS (CANAL BOAT INSPECTOR) FOR THE YEAR 1916.

Section 3 of the Canal Boats Act of 1884, provides that it shall be the duty of every Registration or Sanitary Authority within whose district, any canal, or any part of a canal is situated, to enforce within such district, the provisions of the principal Act, and this Act, and any Regulations made thereunder by the Local Government Board, and every Authority shall within twenty-one days after the 31st day of December in each year, make a report to the Local Government Board as to the execution of the Principal Act, and this Act, and of the Regulations made thereunder as aforesaid, and as to steps taken by such Authority during the year, to give effect to the provisions of the said Acts and Regulations.

(1) Canal Boats inspected during 1916	150
Condition of Boats (Good 112, Fair 21)	133
Infringements	17
Occupants of Boats	All Males
Women and Children sleeping in Canal Boats	Nil.

(2) Infringements :—

(a) Registration	Nil.	(5) Detention of Boats for cleansing and disinfection	Nil.
(b) Notification of change of Master	Nil.	(6) Number of Boats on Register	18
(c) Certificates	Nil.	(7) Number of Boats registered during 1916...	Nil.
(d) Marking	1	(a) Motor propelled Boats	Nil.
(e) Overcrowding	Nil.	(b) Other Boats rendered necessary by structural alterations and change of Owners	Nil.
(f) Separation of Sexes	Nil.	(8) Removal from Register	Nil.
(g) Cleanliness	6	(9) Number of Boats believed to be in use or available :—				
(h) Ventilation	Nil.	(a) Motor propelled Boats	1
(i) Painting	9	(b) Not propelled by Motor	17
(j) Water Vessels	Nil.	(10) Number of Boats that cannot be traced	Nil.
(k) Removal of Bilge Water	1	(11) Number of Boats with accommodation for two males	17
(l) Notification of Infectious Disease	Nil.	(12) Number of Boats with accommodation for three males	1
(m) Admittance of Inspector	Nil.					
(n) Defective Stoves and Chimneys	Nil.					
(o) Roofs leaky	Nil.					
(p) Boats leaky	Nil.					
(3) Legal proceedings taken in respect of infringements	Nil.					
(4) Any other steps taken to secure compliance with the Acts and Regulations ? Yes, Verbal Notices.									

With regard to the Glamorganshire Canal, the upper section, north of Pontypridd, still remains closed ; also the Aberdare Canal, both Sections having been closed, owing to colliery subsidence.

Unfortunately, in July, 1915, a serious breach took place in the Canal at Cilfynydd, south of the Albion Colliery. This has not yet been repaired, therefore the Company is unable to carry goods above Pontypridd. Subsidence is causing a great deal of trouble and expense on this section.

The sanitary condition of the boats is, on the whole, satisfactory.

The lighters engaged in carrying grain, patent fuel, etc., in the docks, have been periodically examined, cleansed, disinfected and repaired during the year. The fishing boats ; also the fish wharves have been regularly visited, cleansed and disinfected.

I wish to record my thanks for the willing assistance given by H.M. Collector of Customs and his staff ; also the Dock Masters of the Cardiff and Penarth Docks and their Officers, as well as to the Superintendent of the Cardiff Railway Company's Police and his Staff, which has been greatly appreciated by all the Officials of the Medical Officer of Health's department.

I have the honour to be, Gentlemen,

Your obedient Servant,

EDWARD WALFORD,

*Medical Officer of Health for the Cardiff
Port Sanitary District.*
